

ALASTAR C RECESSED

ALASTAR C RECESSED (606 mm diameter) provides the same striking circular pool of light as the current variants with the difference that the luminaire is hidden within the ceiling with just enough frame visible to provide an outline to the practically wide 110° beam angle light (7200 lm in CCT 4000 K, 6950 lm in CCT 3000 K). ALASTAR C RECESSED has a power consumption of 73 W and, as with other variants, you can select from a FIX or DALI dimmable driver and benefit from CRI 80+ Ra.
