

ALASTAR C SEMI-RECESSED

ALASTAR C SEMI-RECESSED (606 mm diameter) is for designs where a little more visible housing and colour are required. In this case, the body of the luminaire playfully shows itself through a smooth opening in the ceiling, creating a very different effect to standard surface mounting. The light has a beam angle of 110° (7200 lm in CCT 4000 K, 6950 lm in CCT 3000 K) and CRI 80+ Ra. With power consumption of only 73 W and the option to choose between a FIX and DALI dimmable driver, you are assured of an effective and adaptable lighting solution.
